NISSEN energy - your partner for sustainable energy...

NISSEN energy provides services and products that ensure an economically beneficial production of sustainable energy

We are a strong team with expertise in energy-efficient solutions:

- ✓ Technical advice and optimization.
- ✓ Design and engineering.
- ✓ Production, delivery, installation and commissioning.
- ✓ Monitoring, maintenance, troubleshooting and repair.

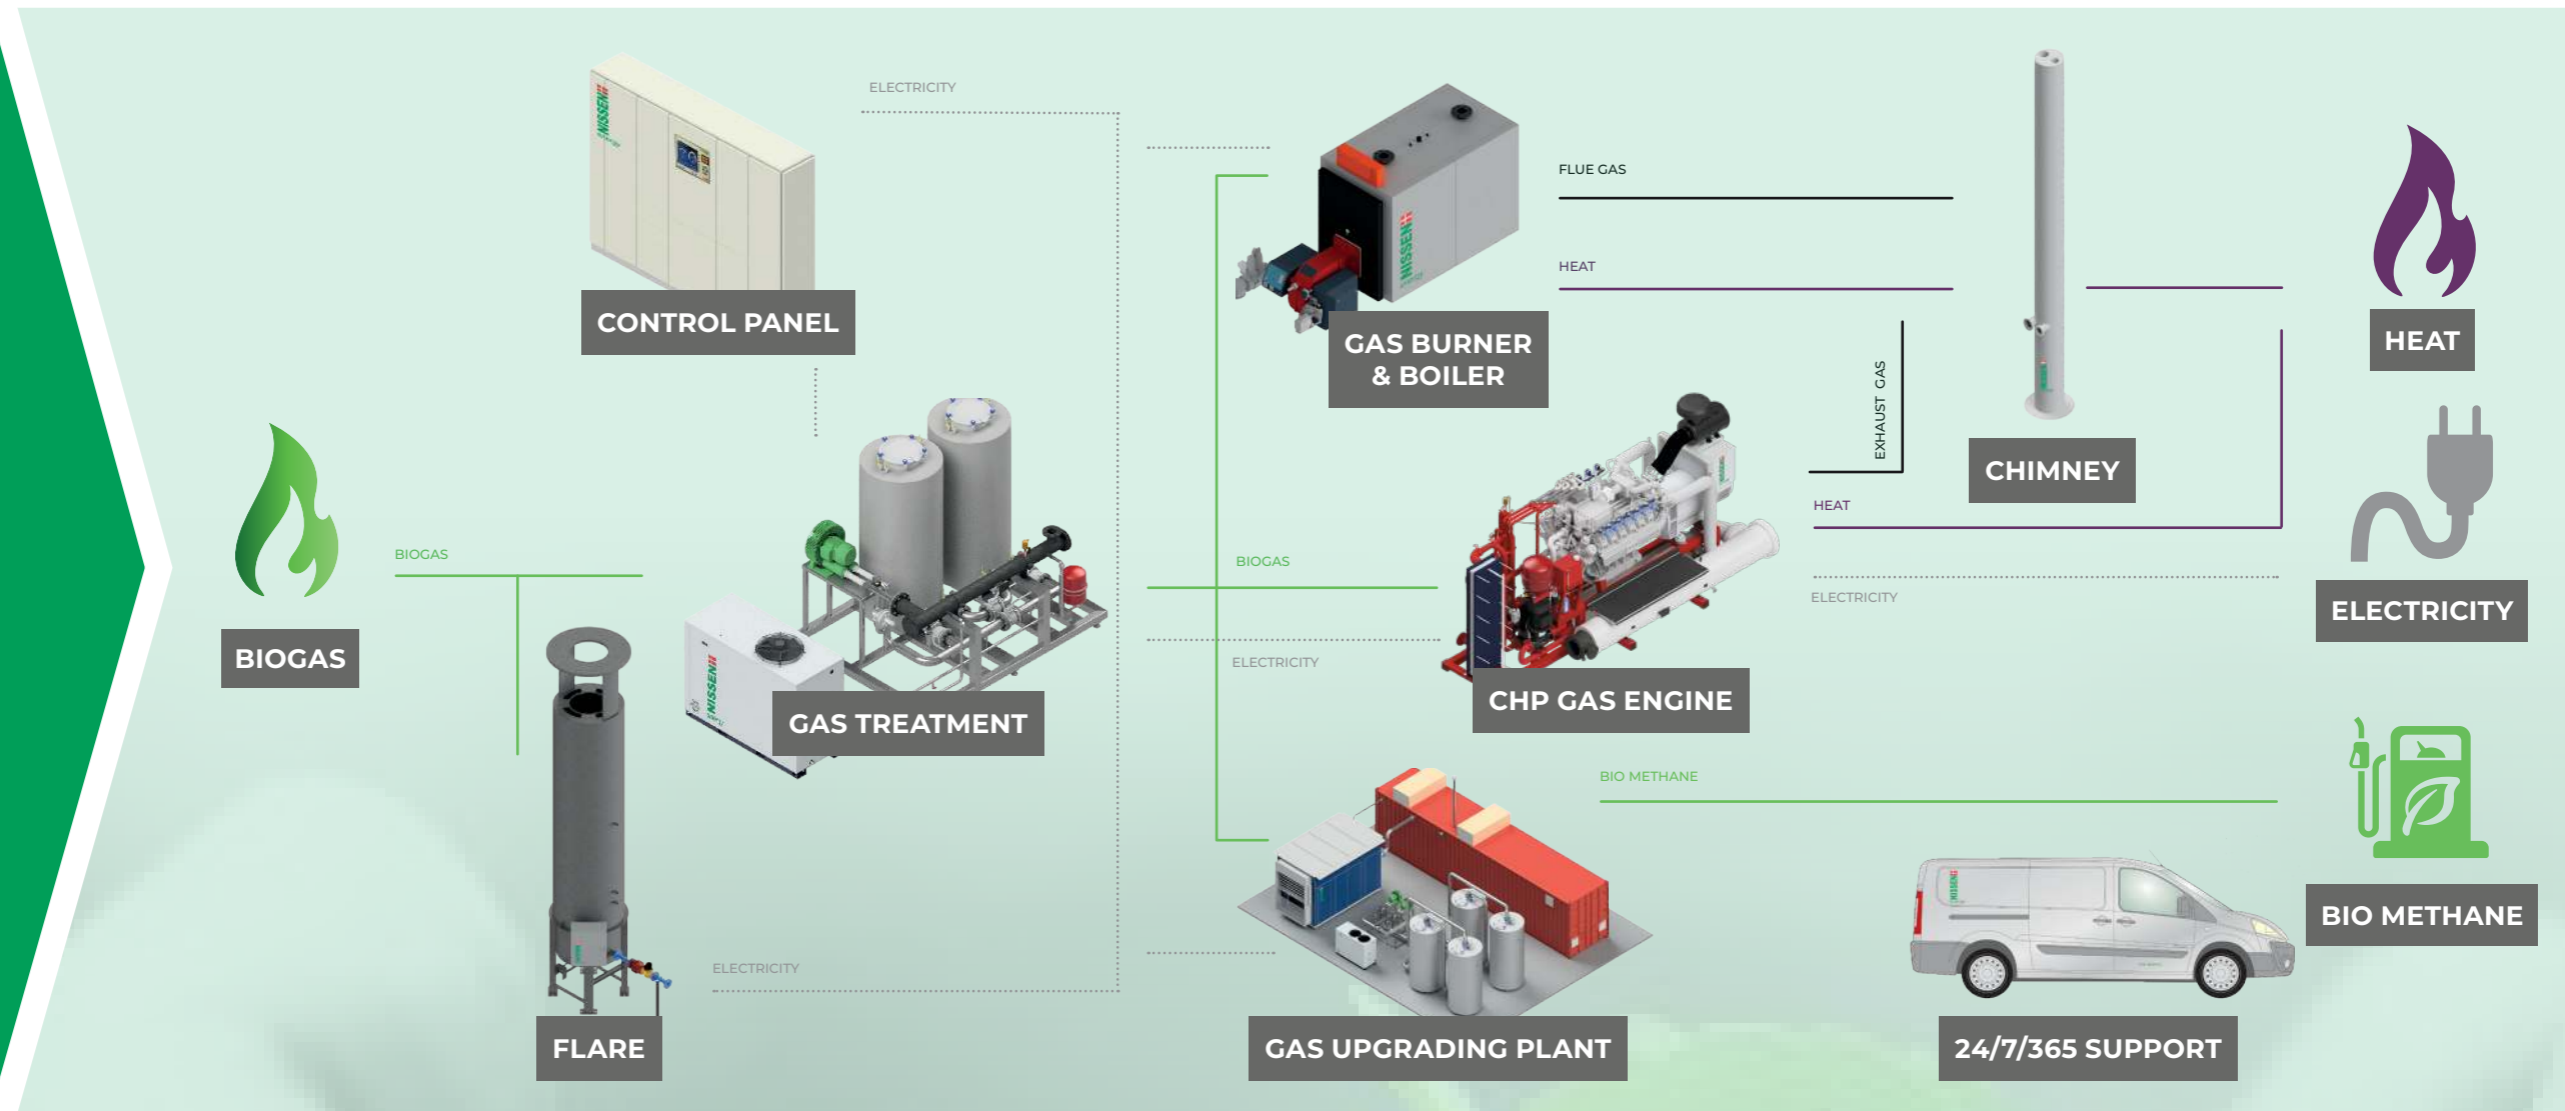

We are ISO 9001: 2015 certified to ensure quality, effective management, and a structured dialogue. We have our customer's satisfaction as one of our main goals.

Together we establish your investment through open dialogue and customized maintenance - it's a part of our DNA

Our solutions meet the customers' requirements and provide reliable and economical operation throughout the plants lifetime.

- ✓ We offer tailor-made maintenance agreements that ensure predictable costs.
- ✓ We are an ISO-certified company with certified service technicians.
- ✓ We have a back office of qualified technicians for planning, support and fast and efficient logistics of spare parts.
- ✓ With NISSEN energy's service organization available 24/7/365, there is a short response time.

We measure our ability to provide maintenance and products based on factors such as reliability, durability, integrity and economy.

Need assessment

What must be taken into account?

- Gas quantity
- Gas quality
- Gas pressure
- Electrical output
- Heat demand
- Emission requirements
- Etc.

Components

Determination of components and performance conditions.

Products:

- CHP gas engine
- Boiler & burner
- Gas upgrading plant
- Gas treatment
- Flare

Additional options e.g.:

- Dump heat radiator
- Ventilation
- Container
- Sound enclosure

Design & Engineering

Design and project proposals with a focus on work environment and easy access for maintenance.

- 2D/3D-design
- Plant diagram
- Technical dimensioning

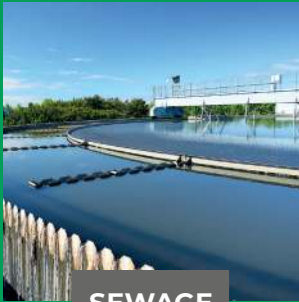

Installation & Project Management

We carry out installations and project management, in collaboration with the customer.

- Turnkey assignments and full or partial project management.
- Installation of individual components.

Optimization & Education

Knowledge is important and we are willing to share. NISSEN Academy helps to ensure the customer's knowledge through training and easy access to documentation.

PRACTICAL EXPERIENCE

For the past 30 years, the company has provided service to the energy sector and consists of a qualified team within energy-efficient solutions.

We see ourselves as an integrator of technologies for efficient use of gas for energy, industry and transport.

We deliver customized solutions designed for many years of efficient operation and focus on competitive prices and low total cost ownership (TCO).

Our service department is available 24/7/365 and ensure that the plant is kept in good condition, has a high uptime, and thus ensure the investment economy.
